

Essential III Flexi-Range

A range of turntables that's ready for you!

When you take a closer look on the current hifi market you will notice that most turntables which are sold nowadays are overblown with features just to make them look more appealing or interesting. Those products have to save on some ends though to make it possible to get to a certain pricepoint. Customers are paying for features they don't need and get a turntable that mostly sounds off. We at Pro-Ject have created the Essential III Flexi-Range with the goal to get the audiophile concerned customer exactly what he wants, but don't cut down on the essential parts that make a turntable sound good. With the new turntable family we're introducing we're giving the customer back his choice to pick exactly the one turntable he desires with the features he seeks. We have taken the phenomenal Essential II, which is considered an audiophile milestone, and have improved it on certain aspects. This guarantees that the customer gets only highest class components. We have added features like lossless **Bluetooth** streaming, high resolution USB LP ripping, **digital** output to send Ones and Zeros to an external D/A converter, soundbar or TV. We have built in electronic **speed control** or **phono** stages for enhanced comfort. These new models will deliver pure audiophile sound but are sure not to break the bank! Positioned at very moderate and affordable pricepoints all models are sure to become the new luxurious centre of many new homes.

Essential III Flexi-Range

A range of turntables that's ready for you!

To each his own strength!

Like in every family the members share the same genetics but differ from each other in looks and capabilities. Every Essential III has its own strengths but all will please ambitious vinyl lovers. The vanilla version of **Essential III** is kept to the basics for the audiophile who wants to hook it up to his phono stage. The **Digital** will, in addition to the regular Essential III, send out high resolution digital signals to an external DAC, Soundbar or even TV! For those who want to listen with their wireless headphones we have the **Essential III Bluetooth**, it sends lossless aptX coded Bluetooth to any Bluetooth receiver within a 10m range. The SB version will please all music lovers that want a certain amount of comfort in their audiophile life, for those the **Essential III SB** will deliver electronic speed control to change speeds with the ease of pushing a button. The **Essential III Phono** is equipped with a phono preamplifier eliminating the need of an external one, it's ready to be connected to your amplifier! For the audiophile on the go we offer the sublime **Essential III RecordMaster**, an Essential III with high quality USB output and special recording software, so that the vinyl treasures can be caught in Ones and Zeros, ready to be heard on any digital system!

The Essential III range consists of six different models:

Essential III,

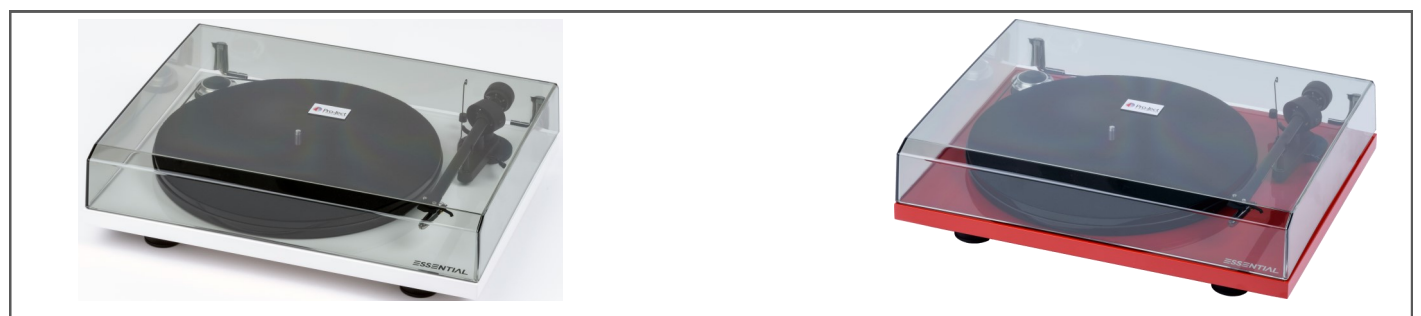

Essential III Phono,

Essential III SB,
