# User Manual

## UHP-3001 8K UHD Media Player

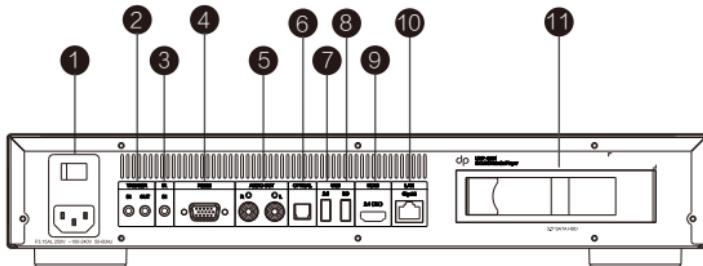

Please read the user manual before installing or using this product

## Front Panel Display

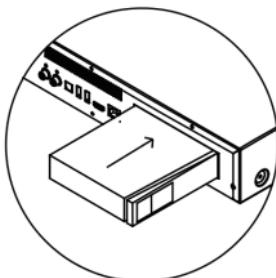

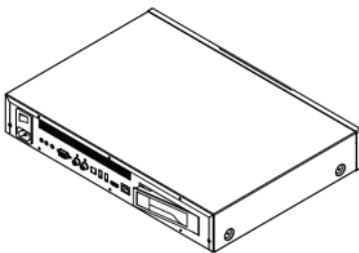

- 1. Power button
- 2. Power indicator
- 3. Wi-Fi/BT Antenna (Built-in)
- 4. Display Screen: Shows time, network/Bluetooth, mute, video output, and other statuses.
- 5. IR Receiver Window

## Terminals and Functions

- 1. AC power Switch&Power IN
- 2. Trigger IN/OUT
- 3. IR IN
- 4. RS232
- 5. Analog L/R Stereo Output Port
- 6. Optical Digital Audio Output
- 7. USB 2.0 Port
- 8. USB 3.0 Port (OTG)
- 9. HDMI 2.1 Port
- 10. Gigabit Ethernet Port
- 11. SATA Hard drive bay

## Hard Drive Installation Steps

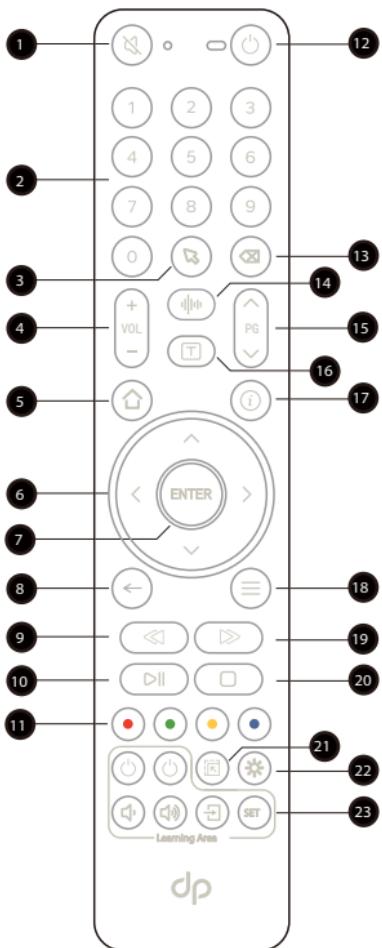

### Hard Drive Installation Steps:

1. Ensure the device is powered off. Facing the player's back panel, open the hard drive drawer door.
2. With the hard drive label facing up, insert the drive into the bay with the SATA connectors pointing inwards. Close the hard drive drawer door.

### Important Notes:

1. This unit ships without a hard drive and requires a separate purchase.
2. Never install or replace the HDD while the player is powered on, to avoid device damage or data corruption.
3. Unformatted new drives will not be recognized. Format the HDD before installing it into this unit.
4. Supported file systems: NTFS, FAT32, EXFAT, etc.
5. Compatible drives: 3.5-inch SATA HDDs, with maximum supported capacity of 24TB.

# Remote Control Instructions

1. Mute

23. Learning Area

# Remote Control Instructions

## 1. Bluetooth Pairing

Point the remote control towards the player's remote sensor, then press and hold the Return and Option buttons on the remote for 5 seconds until the red indicator light flashes. Release the buttons, and the automatic pairing will begin.

## 2. Infrared Learning

Press and hold the SET button on the remote control's learning area for about 3 seconds, until the red indicator light stays on. Align the infrared emitter window of the remote you want to learn from with the emitter of this remote. Press the button on this remote that needs to be learned once, and the indicator light will flash. Then, press and hold the button on the remote to be learned until the indicator light stays on, indicating successful learning. Repeat this process to learn additional buttons. After completing the learning process, press the SET button to exit the learning mode.

## 3. Indicator Light

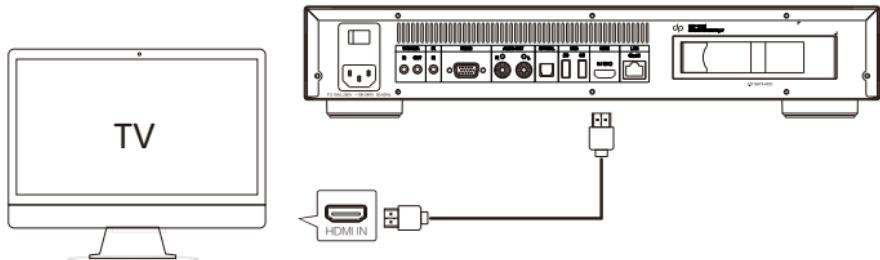

When you press a button, the red light briefly lights up, indicating that Bluetooth

# Connections and Basic Functions

**Tips:** When the device is powered on for the first time, please follow the on-screen boot wizard to set the system language and network.

## 1. HDMI connected to TV

When the TV and the player are powered off, connect one end of the HDMI cable to the HDMI output port of the device and the other end to the HDMI IN port of the TV. After the TV is turned on, select the input source of the TV to the access port of the device to the HDMI2.1 port of TV.

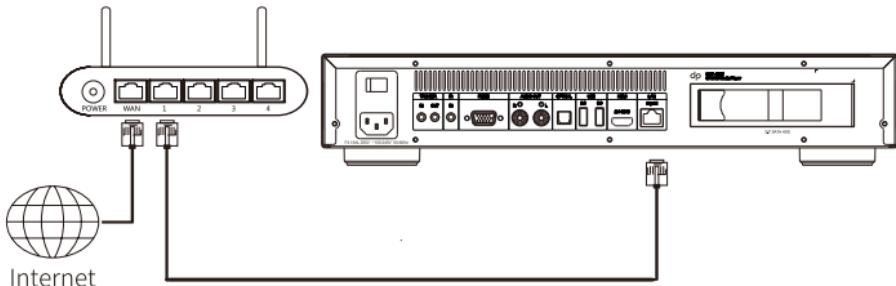

\* To ensure high-quality 8K signal transmission, use an HDMI2.1 certified cable to connect the device to the HDMI2.1 port of TV.

## 2. Network connection

**Wired Network connection:** Connect one end of the network cable to the wired network port of the device and the other end to the LAN port of the switch or router.

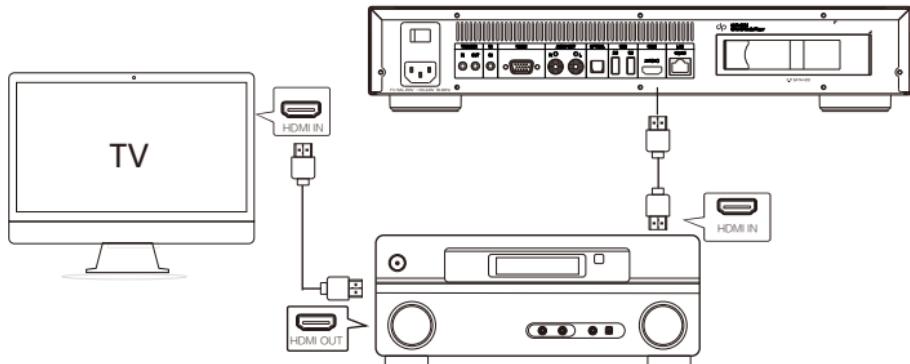

**Wireless WiFi network connection:** Press the Settings button on remote control, select Network Settings - Select wireless network Settings, select the WiFi name that needs to be connected, enter the WiFi password to connect.

# Connections and Basic Functions

## 3. HDMI connects to AV receiver and TV

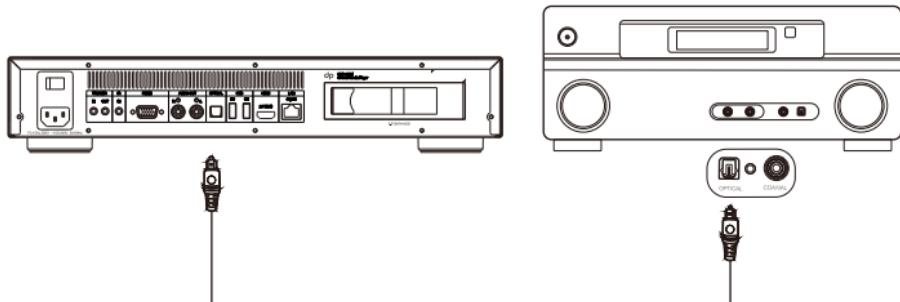

When the TV, AV amplifier and player are powered off, use an HDMI cable to connect the HDMI output of the player to the HDMI input of the AV amplifier, and then connect the output of the AV amplifier to the HDMI input port of the TV. After the device is turned on, select the signal input source of the AV amplifier and TV to the corresponding port for access.

\* To ensure high-quality 8K signal transmission, use an HDMI2.1 certified cable to connect the device. The 8K image output must be connected to the corresponding HDMI2.1 port on the device.

## 4. Optical output connects to audio equipment

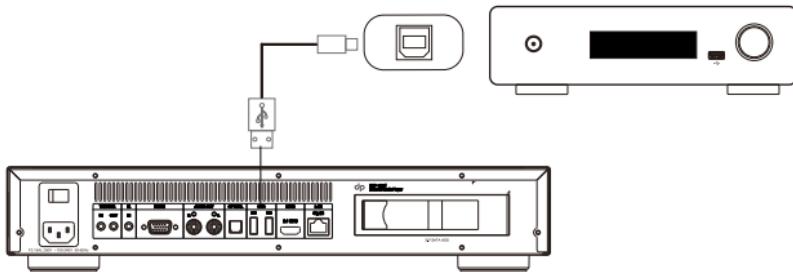

Using an optical audio cable to connect to the audio decoder, active speaker, soundbar, AV receiver and other equipment of optical audio input port.

# Connections and Basic Functions

## 5. USB port connects to audio decoder

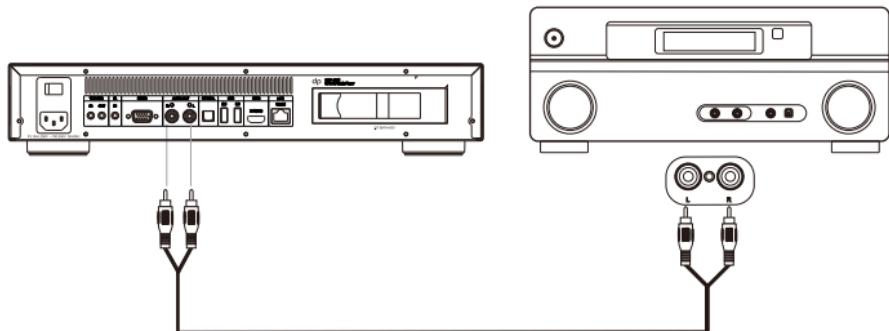

Use the USB Type-A to Type-C or Type-B audio data cable to connect the machine to the USB input of the DAC device, open the "Settings" –"Audio Setting" of the machine, set USB audio On, select USB IN as the input source of the DAC.

\* When USB Audio is an exclusive output, HDMI, optical , and Bluetooth cannot output sound.

## 6. Audio Analog audio output connects to audio devices

Use a RCA analog audio cable to connect to the analog audio input port of the active speaker or power amplifier device.
